

## **ST4 INDUSTRIAL DEGREASER**

### **GENERAL**

ST4 is an industrial strength hard surface degreaser. It effectively dissolves water insoluble soils such as grease, oil and tar. It is often used in parts washers to replace more dangerous solvents.

It has a high flash point and a low aromatic content making it safer to use than traditional solvent cleaners.

ST4 can be used in maintenance workshops, paint shops, boiler rooms amongst many other areas.

### **FORMULATION**

ST4 is made from low aromatic and high flash point solvents. It is non chlorinated and is a safer alternative to these solvents.

### **PRODUCT DESCRIPTION:**

<u>TEST</u>	<u>UNIT OF MEASURE</u>	<u>SPECIFICATION</u>
APPEARANCE	-	Clear, Transparent Liquid
SPECIFIC GRAVITY	g/cm <sup>3</sup>	0.75 – 0.80
SOLUBILITY IN WATER	-	Not soluble
Dielectric strength	Kv	

### **FEATURES**

- Dissolves organic soils such as grease oil and tar.
- High flash point
- Low aromatic content
- Mild odour
- Low evaporation rate
- Safe on most paints and plastic

- Safe on all metals
- Fast penetration

### **APPLICATIONS:**

- Degreasing hard surfaces, metal parts, equipment and vehicles.
- Degrease surfaces prior to coatings.
- Can be used in parts washers and dip tanks.
- Removes soils and greases from process parts.
- Cleans non-energized electrical equipment.

### **DIRECTIONS**

- ST4 should be used as is.
- For painted surfaces, check, on a non-critical area, that it does not damage the paint. Place on the surface and wait 15 minutes – ensure there has been no softening of the paint.
- Apply directly to the surface or submerge the part or equipment. Allow a short time for the action to take place. Occasionally, mechanical action may be required.
- It is recommended that you rinse afterwards with ST4.
- Allow to dry. Blowing dry air on the surface will speed this up.
- Remember that re-lubrication may be necessary for certain parts.
