Buy orange!

- Triple insulation pillows.
- Pillows wrapped with SS mesh for heat dispersion.
- Pillows pinned to frame for longevity and durability.
- Flextra installed joints come with guarantees

High Temperature expansion joints done right.

Want quality?

Buy orange!

- Cheap expansion joints cause expensive problems.
- Buy orange with piece of mind.
- We will design to your needs not sell you a "one size fits all" expansion joint.

When it comes to expansion joints DON'T GO GREEN!

Flextra makes it.

Flextra Guarantees it

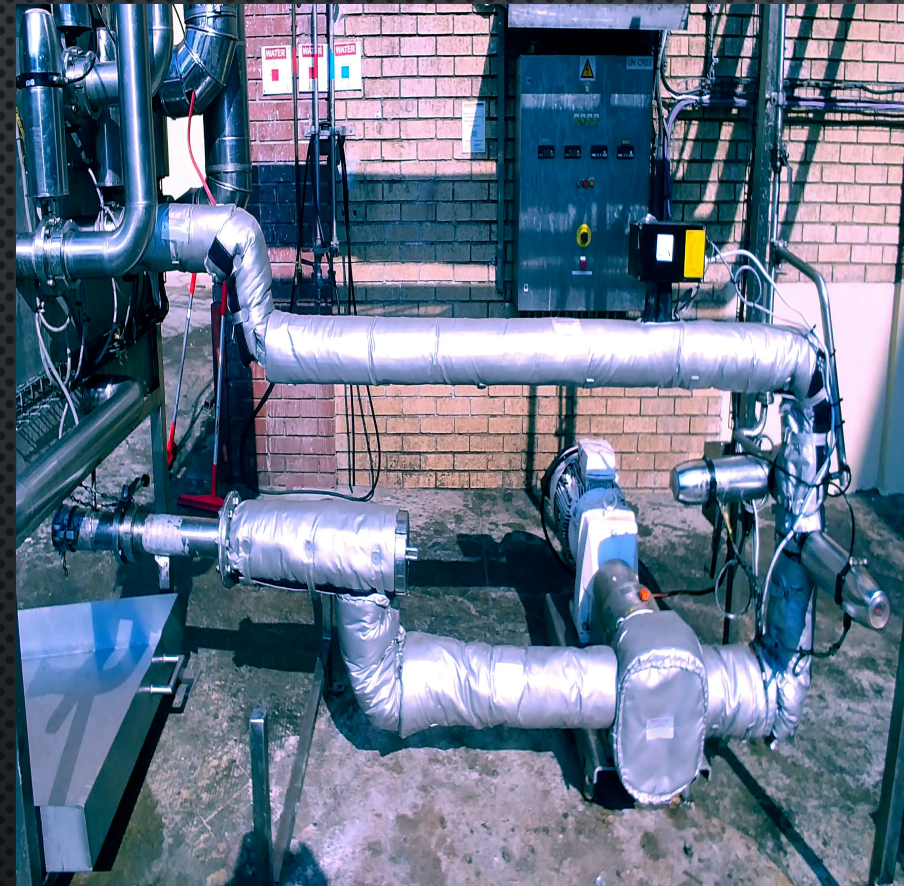

- In-house fabrication of associated metalwork.
- Able to supply complete bolt in units.
- Cutting out the costs of middle men.
- Quality at a competitive price.
- Flextra's quality from start to finish.

Providing a turnkey solution to Expansion joints!

Low Temperature applications

- Personal Protection.
- Improved Insulating efficiency.
- Easily removable for maintenance.
- UV/Weather and acid resistant.
- Faster installation time.
- Higher process temperatures less condensation.

High Temperature applications

Make your process plant more efficient with 21<sup>st</sup> century insulation!

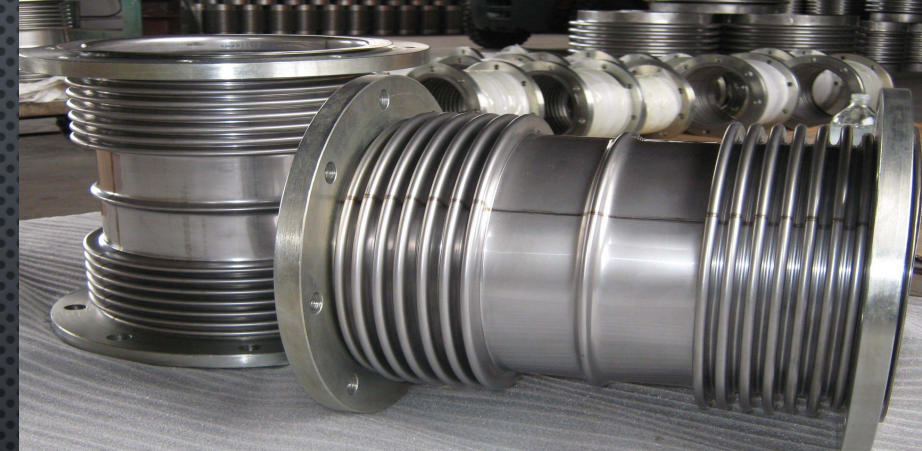

It may be cheaper,

But is it certified?

- All orders come with data packs.
- Bellows are graded and certified as per SANS 347
- SANS certification on pressure vessels is LAW.
- High pressure failures cause high cost claims!

Can you afford the medical claim? Buy certified products from a supplier you can trust.

Don't replace it,

Retro-Fit it!

- The failed metal expansion joints stays in place.
- Our fabricated adapter flanges are installed.
- The new fabric expansion joint is fitted over the metal one.
- saving you **TIME** and **MONEY**.

Failed metal expansion joints? Don't replace the, Retro-fit them with Flextra.
