

AVKOPACK® 1802

CHARACTERISTICS

Gland packing with guaranteed quality manufactured from high technology raw materials and yarns using up-to-dated production technology. AVKOPACK® 1802 is braided from 100 % stainless steel fibers.

Application

AVKOPACK® 1802 is used in hollow glass industry at pushers, bars, tongues, vacuum tools, etc at producing of glass containers, bottles, jam, etc. Material can be welded and ensure long and stable working life.

Advantages

The main material used for the production of this packing is stainless steel fibers. Main advantage is high temperature resistance and abrasive resistance. This packing guarantees long exploitation term and keeps the environment from being polluted.

Technical parameters

Working temperature:	Up to 1300°C
Density	2,34 g/cm ³
Standard dimensions:	5x5 ; 6x6 ; 8x8 ; 10x10 , dia 4, dia 5, dia 6, dia 8, etc
	* Other sizes at request

Quality Control

The whole production process is supervised in accordance with the Quality System ISO 9001, ISO 14001, OHSAS 18001.

Human hazardous

Not registered.

The information listed in this technical data sheet is based on our company's trials and experience. AVKO® JSC is not to be held responsible for poor installation or application in media combining complexity of factors whose total exceeds the general qualities of the product. Our technical and sales representatives will assist any client in need of a product with a peculiar application.
