WELCOME

Sizonke Trading was established in Nelspruit and incorporated specialised product ranges progressively over the years. A focused drive to provide better products and service beyond the customers' expectations has secured Sizonke Trading a place in the local industry. We pride ourselves on getting the job done well, while maintaining excellent customer service. The company works with customers to provide the solutions that help industry run more reliably, efficiently and economically.

ABOUT US

Established in 1997 as a supplier and service provider offering Superior Quality Products for Industry in South Africa, Eswatini and Mozambique.

We incorporated major quality products and supply partners into the group portfolio such as AIGI Environmental Gaskets, AVKO, BOSTIK, Fishbone, FMI, HUDCO, ITS, JÉIL, NRX, SealXpert, Sprayon, Temp-Coat, Tectyl, WEG, TMT & ZRC, Thus we progressively grew into a major service provider to industry.

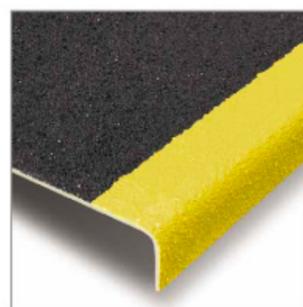

Carrying large quantities of products in stock to speed up supply and delivery.

We are a progressive innovative company focused on plant and equipment reliability; cost savings the environment and a huge focus on food safety.

As a direct import and export company we source the best products for industry and customers from over a dozen countries, with service and good customer relations being our number one priority.

Vision

Take worker Safty to the next level!!!
with extended warrenty periods!!
Challenge US!!!

Black step with yellow nosing

OUR SERVICE

Safe eto Step Installation Service

For business customers and larger commercial, industrial and public projects we recommend our fitting service.

Our teams of fully qualified installers have years experience and have managed a range of installations, from our Anti-Slip Stair and Floor product range and GRP Grating to Industrial Lining and Coatings installations throughout the South Africa.

The ideal solution for companies that simply do not have the time or staff available or a facilities management team handy to carry out the installation required.

How does the installation service work?

After receiving a brief, our estimator will visit and undertake a free site survey. This includes accurate measuring of the site to ensure exact cutting of materials and to avoid wastage.

Risk assessments and method statements will be supplied before any commencement of work is carried out for your approval, with a recommendation of products most suitable, with your quotation.

We'll discuss the entire installation procedure and arrange the most convenient time for your installation.

Safe to Step products are so versatile they can be applied to nearly any existing substrate and are quick and easy to install. Well within the capabilities of most maintenance departments, securing is achieved with adhesives and/or a selection of mechanical fixings. It is a finished product so the areas in question can be used immediately.

Safe to Step non-slip products can be cut and manufactured to individual specifications or if required an installation service is available.

PRODUCT OVERVIEW

Anti-slip stair and floor safety solutions for the workplace

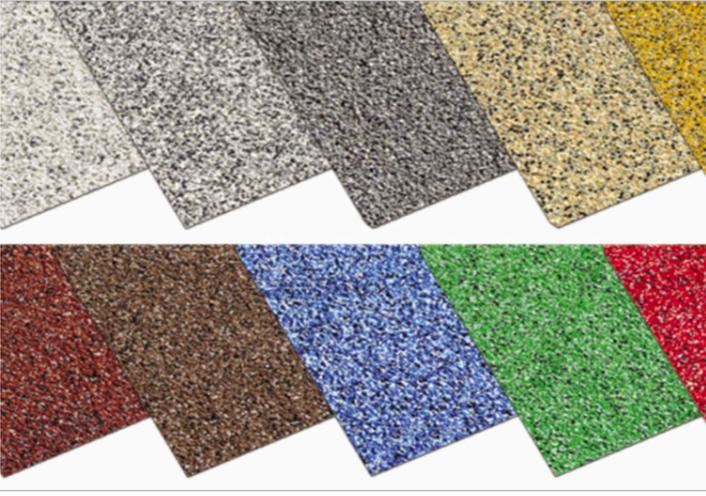

When it comes to safety, our anti-slip flooring, stair covers and grating reduces injuries and staff downtime even in the most slippery conditions.

Anti-slip flooring consists of special anti-slip sheets that can be applied to existing flooring to improve its slip resistance. It's an essential safety feature for industrial areas, walkways and stairs to help prevent injuries to staff and slip-related accidents.

Safe to Step is the premier slip-resistant flooring from Sizonke Trading. It incorporates a quartz gritted surface – which means it remains slip resistant if liquids, ice or even oil is present.

The addition of isophthalic polyester and vinyl ester resins ensure Safe Tread flooring won't corrode in even the harshest chemical environments, making it ideal for industrial areas.

Slip-resistant products are available for floors, walkways and stairs and can be applied to almost any surface, making them an excellent alternative to replacement flooring.

The slip problem

33% of all reportable major injuries are due to slips and trips.
20% of "over 3 day" injuries to employees are due to slips and trips.

The anti-slip solution

Safe to Step anti-slip flooring products are designed to be a quick and cost effective solution to improving safety in potential slip hazard areas.

Slip resistant

Safe to Step flooring products have an anti-slip surface ensuring outstanding slip resistance even in wet and oily conditions. They have consistently reduced slips and falls in industrial, commercial and public use.

Durability

All our anti-slip products incorporate a quartz gritted surface. This has good thermal shock resistance, corrosion resistance and stiffness making it the perfect product when wear and corrosion resistance are primary performance requirements.

Corrosion resistance

Our anti-slip products are manufactured with high quality fibreglass impregnated with isophthalic polyester or vinyl ester resins ensuring they are suitable for use in the harshest of chemical environments

DDA and building regulations

Safe to Step products comprehensively fulfil the requirements specified in the UK Building Regulations Act and the final stage of the Disability Discrimination Act.

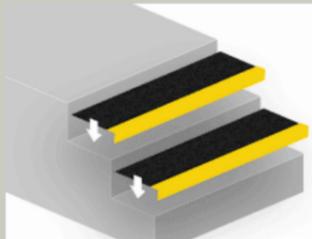

PRODUCT CATALOGUE

Anti-slip flooring consists of special anti-slip sheets that can be applied to existing flooring to improve its slip resistance. It's an essential safety feature for industrial areas, walkways and stairs to help prevent injuries to staff and slip-related accidents.

Safe to Step is the premier slip-resistant flooring from Sizonke Trading. It incorporates a quartz gritted surface – which means it remains slip resistant if liquids, ice or even oil is present.

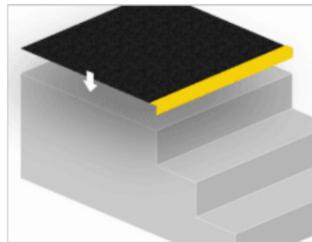

The addition of isophthalic polyester and vinyl ester resins ensure Safe Tread flooring won't corrode in even the harshest chemical environments, making it ideal for industrial areas.

Slip-resistant products are available for floors, walkways and stairs and can be applied to almost any surface, making them an excellent alternative to replacement flooring.

Safe to Step GRP Stair Treads safety solution

Step to Safe Stair Tread Covers are manufactured with the anti slip grit embedded into the surface during the production of the GRP substrate, guaranteeing an inseparable bond between the two.

GRP Stair Covers with extra depth for stair landing areas.

Safe to Step non-slip Landing Covers are a quick and cost effective solution to improving safety in potential slip hazard areas and help towards achieving Disability Discrimination Act compliance.

Avoid stairway slips with non-slip Stair Nosings

Quick and easy to install Safe to Step non-slip stair edge nosing offers a cost effective, long term solution to help comply with the final stage of the Disability Discrimination Act, with particular reference to the visually impaired.

Our Benefits

These are just some of the properties of our anti-slip products:

- Quick to install
- Cost-effective
- Impact resistant
- Chemical resistant

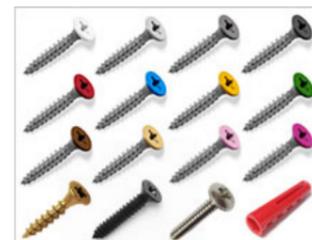

Safe to Step GRP gritted flat sheets for floors

Made from hardwearing and durable Glass Reinforced Plastic, non-slip Floor Sheets, also known as GRP Plates have a highly effective gritted anti-slip safety surface, are long lasting, quick to install and a cost effective solution to improving safety in potential slip hazard areas. All environments.

Access Platforms, Up and Over Steps, Step-Overs and Walkways

GRP access platform systems are suitable for industrial and commercial environments, designed to comply with all relevant standards and provide a safe, maintenance-free and cost-effective alternative to metal or wooden structures.
